Biotechnology

- I. Adler, J. Diekmann, W. Hartke, V. Hecht, F. Rohn, K. Schügerl: Bubble Coalescence Behaviour in Biological Media. II. Effect of Antifoam Additives 171
- S. Fukui, S. A. Ahmed, T. Omata, A. Tanaka: Bioconversion of Lipophilic Compounds in Non-Aqueous Solvent. Effect of Gel Hydrophobicity on Diverse Conversions of Testosterone by Gel-entrapped *Nocardia rhodococcus* Cells 289
- D. F. Gerson: The Pressure Fluctuation Spectrum as a Measure of Mixing and Emulsification in a Biochemical Reactor 59
- A. Kretschmer, F. Wagner: Influence of Hyperbaric Oxygen Tension on Growth Parameters of *Candida tropicalis* and *Rhodococcus erythropolis* 41
- A. Kretschmer, F. Wagner: Influence of Hyperbaric Oxygen Tension on the Metabolism of *Candida tropicalis* and *Rhodococcus erythropolis* 51
- H. J. Kuhn, B. Cometta, A. Fiechter: Effects of Growth Temperature on Maximal Specific Growth, Rate, Yield, Maintenance, and Death Rate in Glucose-Limited Continuous Culture of the Thermophilic *Bacillus caldoteanax* 303
- Y. Morikawa, I. Karube, S. Suzuki: Enhancement of Penicillin Acylase Activity by Cultivating Immobilized *Kluyvera citrophila* 23
- K. Murata, K. Tani, J. Kato, I. Chibata: Glutathione Production Coupled with an ATP Regeneration System 11
- I. Nilsson, S. Ohlson, L. Häggström, N. Molin, K. Mosbach: Denitrification of Water Using Immobilized *Pseudomonas denitrificans* Cells 261
- L. Nyeste, B. Sevelia, L. Szigeti, A. Szöke, J. Holló: Modelling and Off Line Optimization of Batch Gluconic Acid Fermentation 87
- S. Ohlson, S. Flygare, P.-O. Larsson, K. Mosbach: Steroid Hydroxylation Using Immobilized Spores of *Curvularia lunata* Germinated in situ 1
- U. Onken, P. Weiland: Hydrodynamics and Mass Transfer in an Airlift Loop Fermentor 31
- W. Sidler, H. Zuber: Isolation Procedures for Thermostable Neutral Proteinases Produced by *Bacillus stearothermophilus* 197
- J. C. van Suijdam, N. W. F. Kossen, P. G. Paul: An Inoculum Technique for the Production of Fungal Pellets 211
- C. T. Verrips, D. Smid, A. Kerkhof: The Intrinsic Microbial Stability of Water-in-Oil Emulsions. II. Experimental 73
- C. T. Verrips, J. Zaalberg: The Intrinsic Microbial Stability of Water-in-Oil Emulsions. I. Theory 187
- M. Wada, J. Kato, I. Chibata: Continuous Production of Ethanol Using Immobilized Growing Yeast Cells 275

Food Microbiology

- M. Barak, S. Ulitzur: Bacterial Bioluminescence as an Early Indication of Marine Fish Spoilage 155
- R. Chander, N. F. Lewis: Effect of Lysozyme and Sodium EDTA on Shrimp Microflora 253

Industrial Microbiology

- T. A. El-Kersh, J. R. Plourde: Biotransformation of Antibiotics. III. Localization of Chloramphenicol Acetyltransferase in Spores of *Streptomyces griseus* and Specific Formation of Chloramphenicol-3-Acetate by this Enzyme 317
- M.-L. Fardeau, F. Plasse, J.-P. Belaich: Microcalorimetry: A Tool for the Study of the Biodegradability of Straw by Mixed Bacterial Cultures 133
- J. González-López, T. de la Rubia, A. Ramos-Cormenzana: Bacteriological Phosphate Determination in Defined Liquid Media with *Pseudomonas fluorescens* Var. Aureofaciens 357
- T. Kachholz, H. J. Rehm: Degradation of Long Chain Alkanes by Bacilli. III. Degradation by Thermophilic Bacilli 95
- J.-i. Koizumi, S. Aiba: Significance of the Estimation Light-Absorption Rate in the Analysis of Growth of *Rhodopseudomonas spheroides* 113
- M. G. Laivenieks, A. B. Tsiomenko, E. N. Ratner, B. A. Fikhte, I. S. Kulaev: Synthesis of Acid Phosphate During Dehydration of the Yeast *Saccharomyces cerevisiae* 349
- T. Matsunaga, I. Karube, S. Suzuki: Electrochemical Determination of Cell Populations 125
- T. Matsunaga, I. Karube, S. Suzuki: A Specific Microbial Sensor for Formic Acid 235
- H. H. Reber, G. Thierbach: Physiological Studies on the Oxidation of 3-Chlorobenzoate by *Acinetobacter calcoaceticus* Strain Bs 5 223

926953

- H. Sawada, S. Kinoshita, T. Yoshida, H. Taguchi: Microbial Production of Chenodeoxycholic Acid Precursor, 12-Ketochenodeoxycholic Acid, from Dehydrocholic Acid 107
- C. H. Schein, A. Fiechter: Pigment Production in Chemostat Cultures of *Streptococcus bovis*. I. Pigment, Glucose Endproducts, and Morphology as Functions of the Glucose Addition Rate 327
- C. H. Schein, A. Fiechter: Pigment Production in Chemostat Cultures of *Streptococcus bovis*. II. Effect of Carbon Dioxide and pH on Pigment and Glucose Endproducts 341
- U. Schömer, F. Wagner: Production of Steroid-Ring-B-Seco Acid from β -Sitosterol and Influence of Surfactants on Sterol Uptake in *Nocardia*-sp. M 29-40 99

Microbiology of Sewage and Industrial Wastes

- H. Brunnert, F. Zadržil: Translocation of Cadmium and Mercury in Straw Columns Colonized by the Fungus *Pleurotus cornucopiae* Paul ex Fr. 145
- J. C. Joret, J. C. Block, F. Lucena-Gutierrez, L. Schwartzbrod, B. Hugues, M. Plissier: Virus Concentration from Secondary Wastewater: Comparative Study Between Epoxy Fiberglass and Glass Powder Adsorbents 245

Short Communication

- K. Shah, I. Mehdi, A. W. Khan, V. C. Vora: Microbial Transformation of Sterols. I. Microbial Transformation of Phytosterol to Androsta 1,4 diene 3,17 dione by *Arthrobacter simplex* 167
- F. C. Stermer: A New Hydrocarbon Degradation Fungus: *Verticillium lecanii* 259
